

# SpecsIntact eLearning Modules Transcript

## Module: Chapter 1 - ThinApp Setup

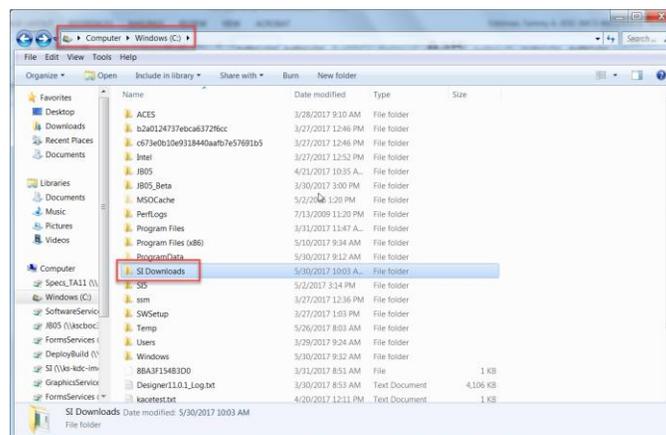

We highly recommend that you view the corresponding eLearning Module visual representation of the subject matter.

00:00:10,533 --> 00:00:34,933

The ThinApp version of SpecsIntact is VMWare designed for users wanting to run the latest version of SpecsIntact without installing it on the underlying operating system. The ThinApp version is a virtualization software that runs on your system without modifying the systems registry or other system related files.

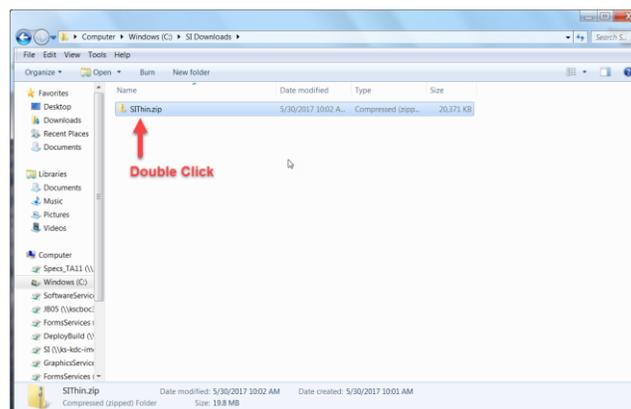

00:00:34,933 --> 00:00:44,466

We can now begin the setup process by opening Windows Explorer in order to locate the SITHin.zip file previously downloaded. As you see, I saved the downloaded file in the SI Downloads folder on my C: Drive. In most cases, you will use the Windows built-in self-extractor to unpackage zipped files.

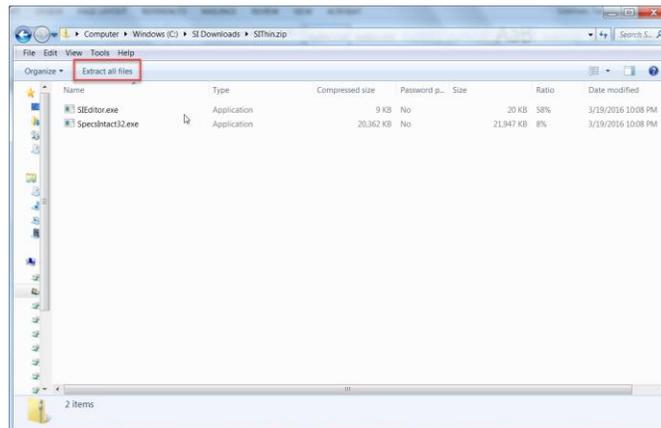

00:00:44,466 --> 00:02:21,166

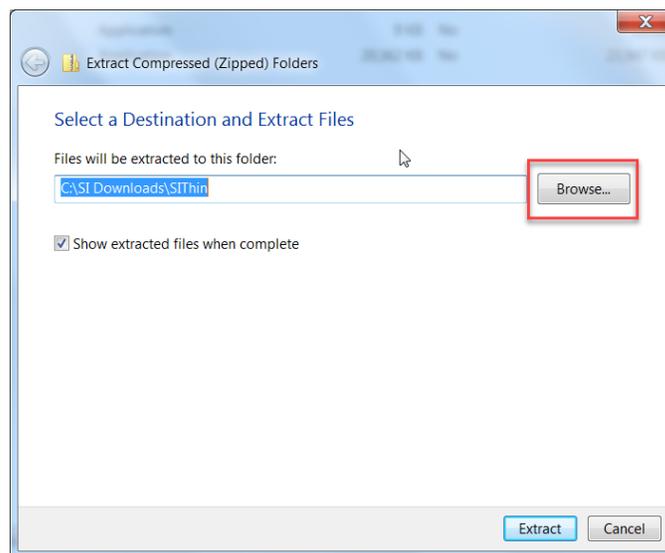

Let's start by *double-clicking* on the SITHin.zip file,

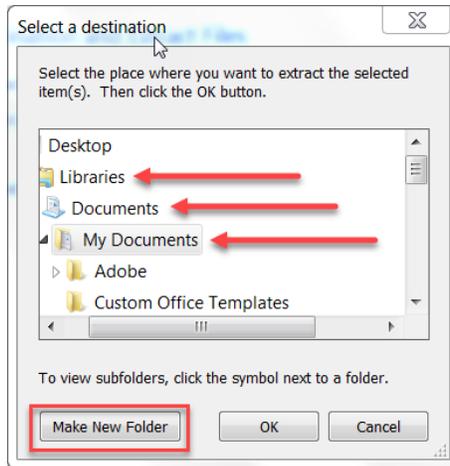

now select **“Extract all files.”**

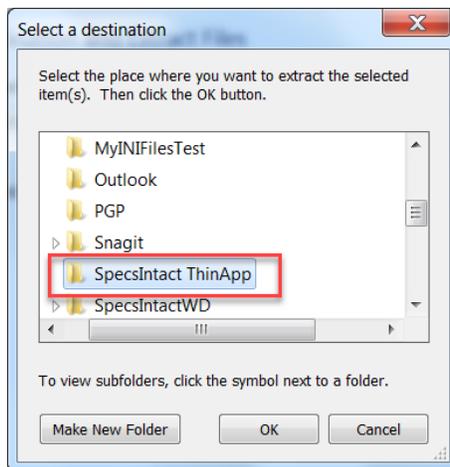

When the window opens, select the **Browse** button so that we can choose the destination folder.

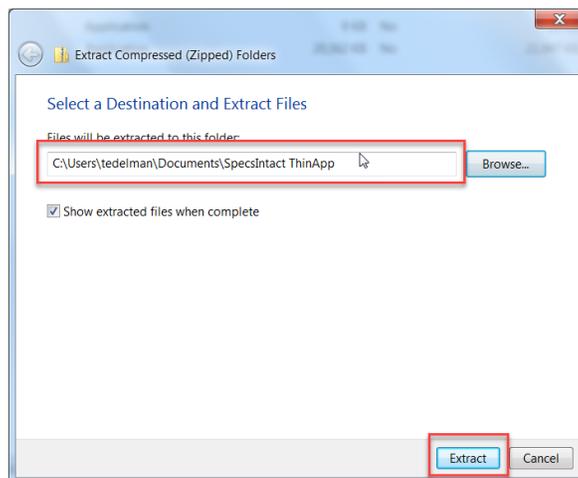

Now let's select **Libraries**, then **Documents** and **My Documents**.

Since we do not have a folder setup for the ThinApp version, select the **"Make New Folder"** button and enter **'SpecsIntact ThinApp'** and then select **OK**.

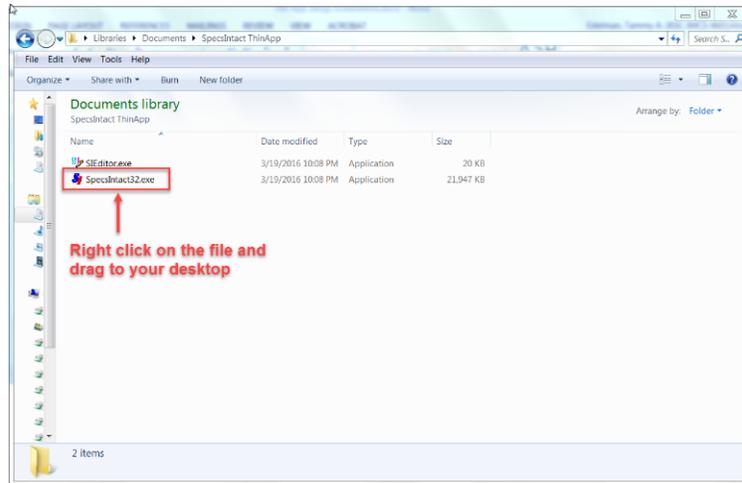

Before we continue, verify the path reflects the correct location, and then select the **Extract** button.

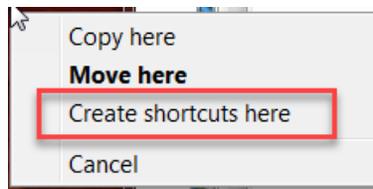

---

We now have the necessary files to run SpecsIntact. In order to simplify the process, you will need to create a shortcut on your desktop so that you do not have to navigate to this location in order to launch the application each time. To do this, *right-click* on the **SpecsIntact32.exe** file to *drag-and-drop* the file to your **desktop**,

when you release the right-click, a menu appears with the available options, select '**Create shortcut here**'.

You have now successfully extracted the ThinApp version. If SpecsIntact has never been installed on your system, you will need to complete the setup process.

Proceed to the Working Directories and Connect UFGS Master modules in order to guide you through the rest of the setup process.

---

## Contact Information

---

If you need further assistance, please contact our Technical Support Desk. We will be happy to answer any questions you may have.

**SpecsIntact Technical Support**

Monday - Friday

8:00 AM – 4:30 PM Eastern Time
